CHAPTER V

CONCLUSION AND SUGGESTIONS

In this chapter, the researcher discusses the conclusions and the suggestions based on the findings and interpretations presented in the previous chapter.

5.1 Conclusions

Based on the research findings, two key conclusions can be drawn. First, students generally showed a moderate level of Foreign Language Enjoyment (FLE). While many experienced positive emotions such as enjoyment and curiosity, these feelings varied among students. This confirms that FLE is a dynamic emotional experience, influenced by both internal and external factors.

Second, the social dimension, especially the teacher's role, was the most influential factor in shaping students' enjoyment. Teacher support, encouragement, and interactive teaching created a positive classroom climate that enhanced students' engagement and motivation.

In short, students' enjoyment in learning English was shaped by a combination of personal feelings and teacher-driven classroom interactions, highlighting the importance of both emotional support and effective pedagogy.

5.2 Suggestions

Based on the conclusions of this study, the researcher offers the following suggestions:

5.2.1 For Students

Students are encouraged to be more active and engaged in the English learning process. They should maintain a positive attitude, build self-confidence, and strive to enjoy the learning experience by participating in class activities, practicing independently, and exploring English through personal interests such as music, movies, or reading. Increasing self-motivation can help improve both enjoyment and learning outcomes.

5.2.2 For English Teachers

Teachers are advised to continue creating a supportive and enjoyable classroom atmosphere. This can be achieved through interactive activities, positive reinforcement, and building good relationships with students. Teachers should also pay attention to students' emotional needs and help them build self-confidence, as this greatly affects their level of enjoyment and engagement in learning English.

5.2.3 For Future Researchers

Future researchers are recommended to explore Foreign Language

Enjoyment (FLE) in various learning contexts and at different

educational levels. It would be beneficial to combine quantitative and qualitative approaches to gain a deeper understanding of the emotional and psychological aspects of language learning. Moreover, future studies could examine the impact of specific teaching strategies or educational technologies on students' FLE.
